

NovaBank System Architecture

High-level component and data flow diagram

Architecture Details

- **Frontend Framework:** Next.js 14 (App Router) with React, TailwindCSS.
- **Backend:** Next.js API Routes (Serverless Functions) handling data logic.
- **Database:** PostgreSQL (Neon/Local) with connection pooling via pg package.
- **Authentication:** NextAuth.js configured with Credentials provider.
- **State Management:** React Hooks (useState, useEffect) with real-time fetch polling.
